

VTB - STICKERS MODULE

UMBRELLA TEMPLATE

Virtual Tour Builder: *by Spacery Wirtualne* - biuro@spacerywirtualne.pl

The stickers module is based on specific link that are generated by PHP. This means that the user only decide whether the visitor can change the stickers module and link can generate.

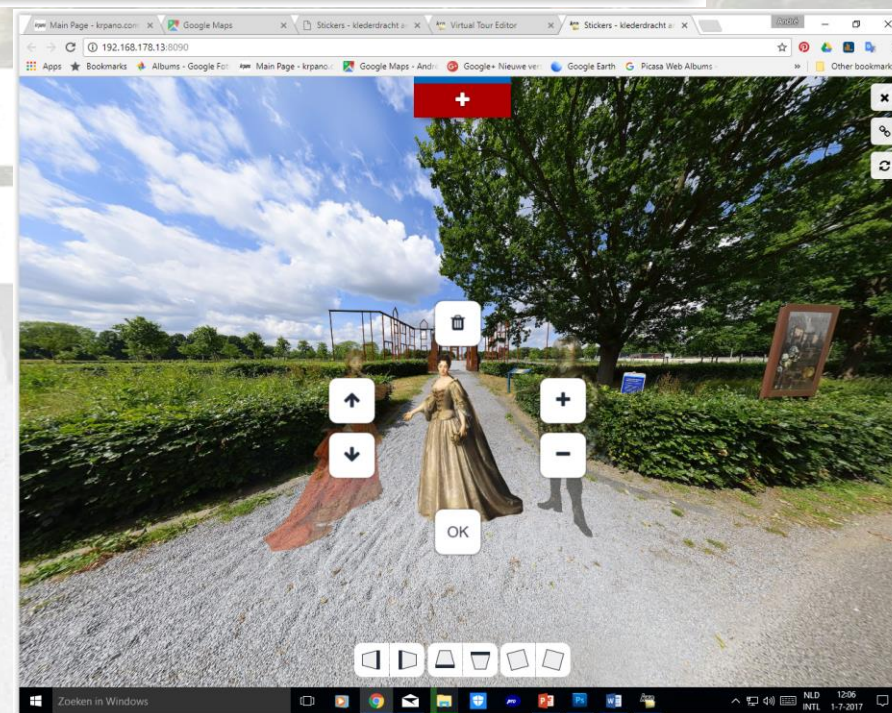

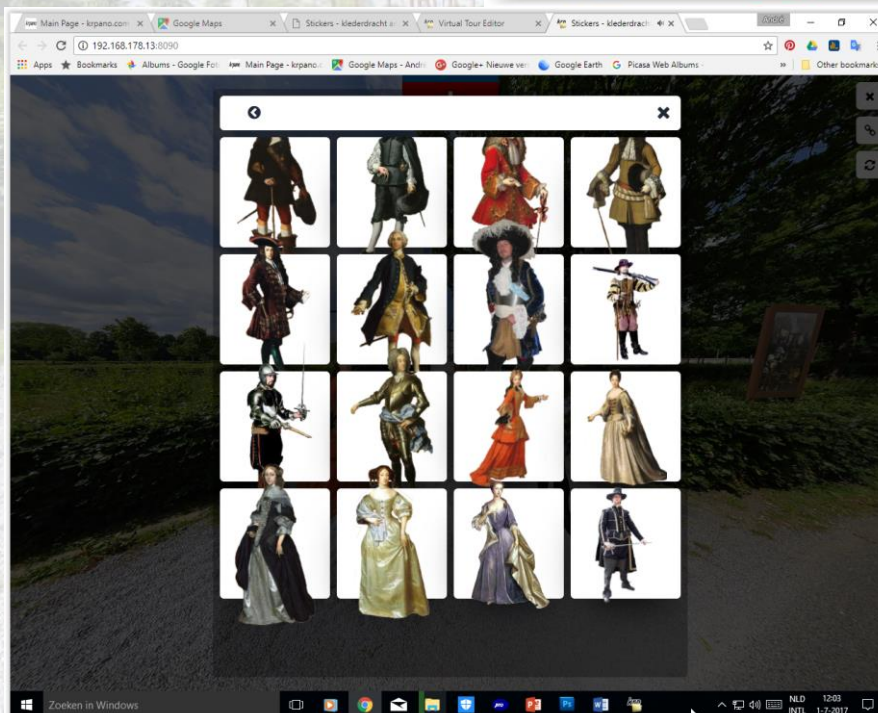

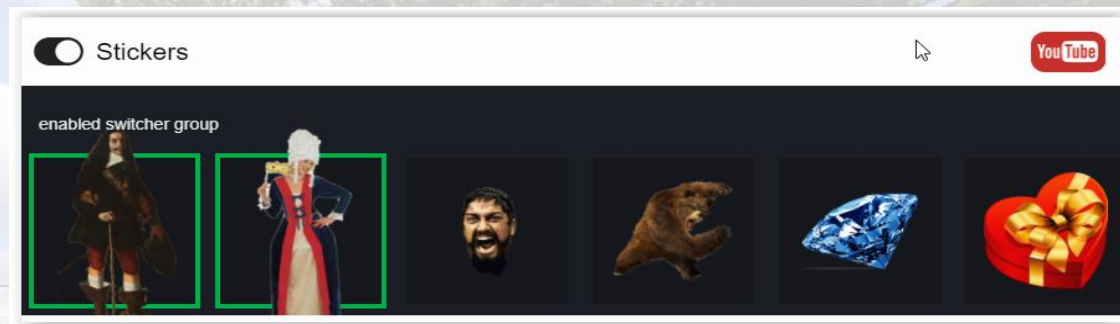

This makes the privacy assured that only the people who have the link only see the stickers.

Actions that you perform in succession and decide whether the visitor can change sticker module!

- Work offline with sticker module & select sticker groups
- Work offline with files & Save tourdata.xml
- Upload your project from your local site to remote site (internet)
- Select online and positioning your stickers
- Create sticker-ID and copy from the generated link
- Online writes an xml file generated by PHP vb 978744130099154.xml
- Change your index.html source code
- Change Tourdata.xml (visitors can only look)
- Don't change Tourdata.xml (visitors can change/editing the sticker module)
- Example from www.krpanostore.com

Work offline with sticker module & select sticker groups

- Choose desired stickers and positioning.
- Umbrella Sticker button

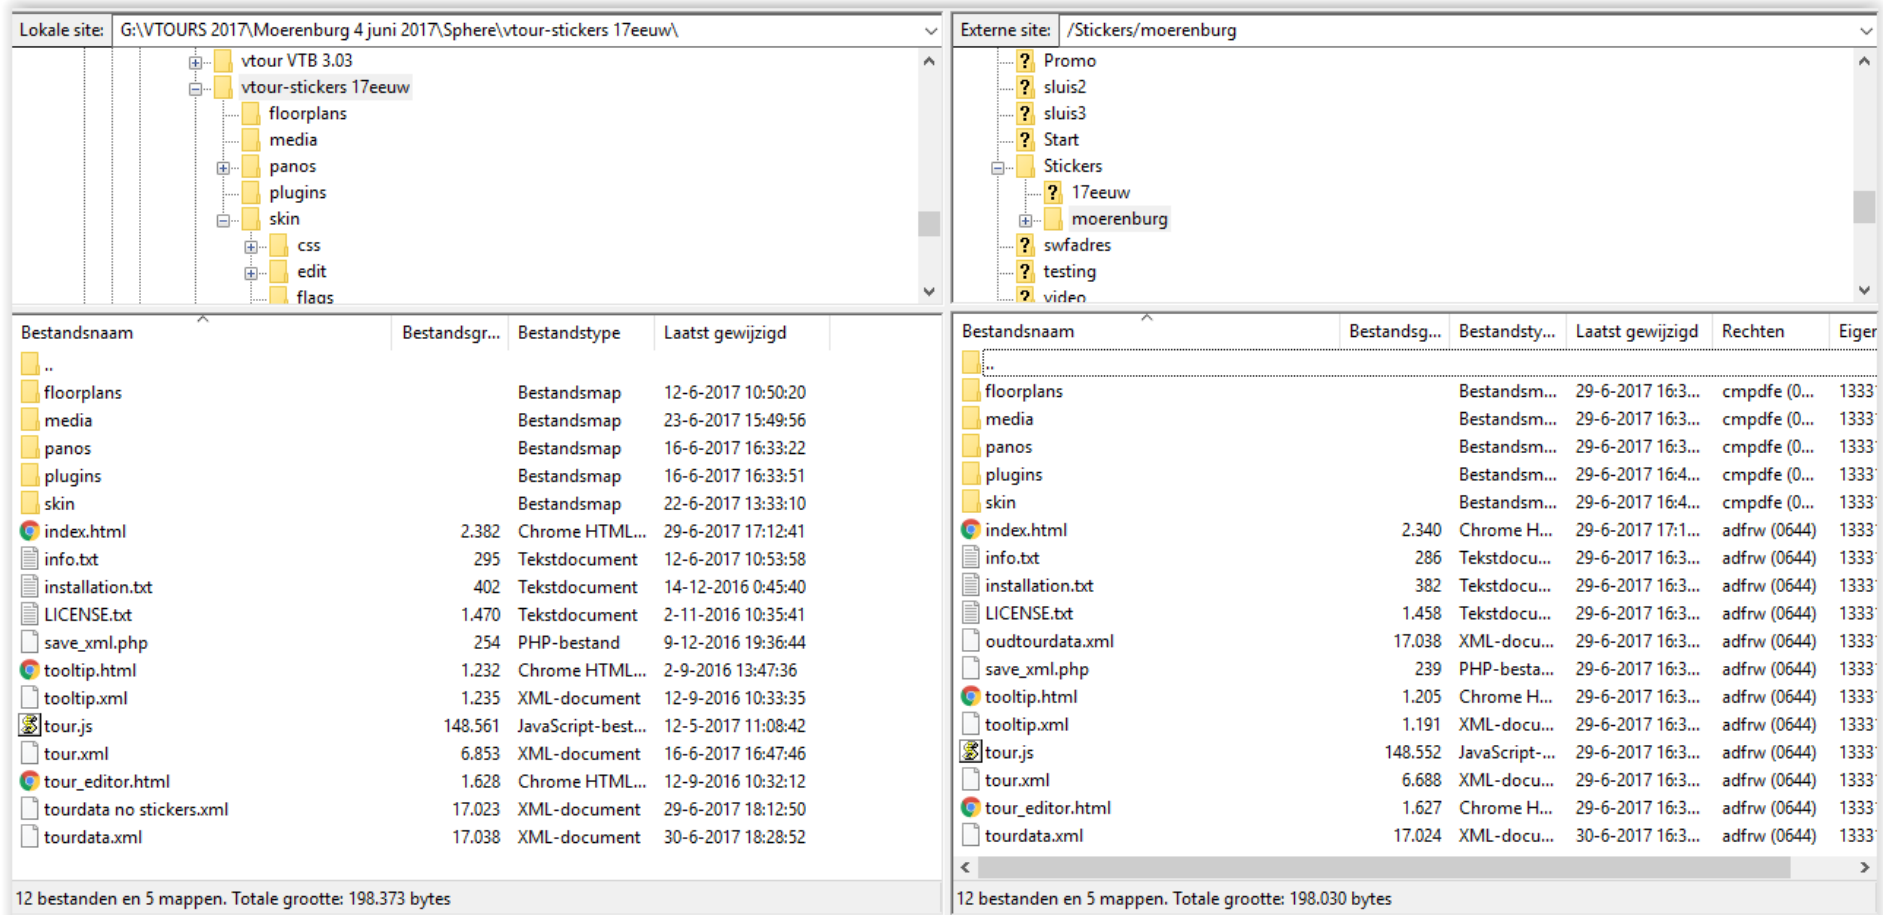

Work offline with files & Save tourdata.xml

- `<modules name="m_stickers" aktyw="true" groups="moerenburg|eeuw" />`

</stickers>
</krpano>
```

Change your index.html source code

- `embedpano({xml:"tour.xml", target:"pano", html5:"only+webgl",`
- `initvars:{sticker: 978744130099154}, mobilesca1.0,`
- `passQueryParameters:true});`

```
target:"pano", html5:"only+webgl", initvars:{sticker: 978744130099154}, webglsettings:{preserveDrawingBuffer:true}, mobilesca1.0, passQueryParameters:true});
```

Change Tourdata.xml (visitors can only look)

- We need to modify the tourdata.xml so that the visitors online can watch the virtual tour and nothing change.
- `<modules name="m_stickers" aktyw="true" groups="moerenburg|eeuw" />`
- Change to:
- `<modules name="m_stickers" aktyw="false" groups="" />`
Upload tourdata.xml to your external site (internet)

```
<global_modules>
  <modules name="m_map" aktyw="true" maptype="satelite" distance="kilo">
  <modules name="m_facebook" aktyw="false" id="facebook ID" />
  <modules name="m_analytics" aktyw="true" />
  <modules name="m_logo" aktyw="false" id="Huize Moerenburg 1697" www=
  <modules name="m_copyright" aktyw="true" id="Bolpanorama" www="http:
  <modules name="m_social" aktyw="true" />
  <modules name="m_vrmenu" aktyw="true" />
  <modules name="m_stickers" aktyw="true" groups="moerenburg|eeuw" />
  <modules name="m_infobox" aktyw="false" />
  <modules name="m_keepview" aktyw="false" />
  <modules name="m_arrowmode" aktyw="false" />
  <modules name="m_radarmode" aktyw="true" />
</global_modules>
```

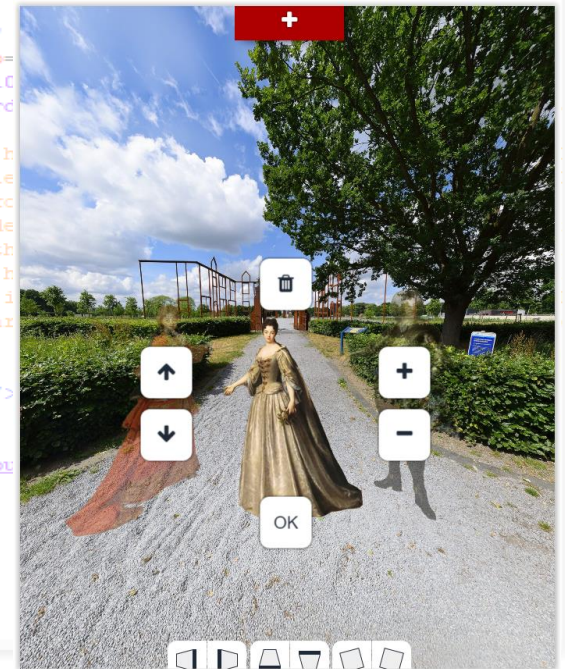

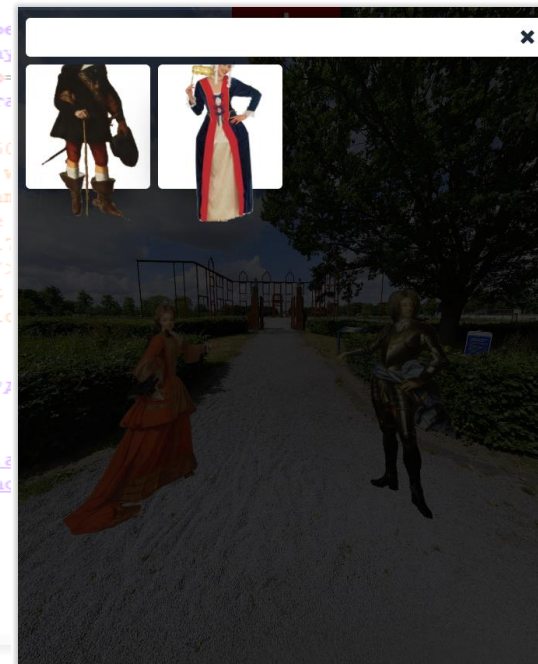

```
<global_modules>
  <modules name="m_map" aktyw="true" maptype="satelite" distance="kilo">
  <modules name="m_facebook" aktyw="false" id="facebook ID" />
  <modules name="m_analytics" aktyw="true" />
  <modules name="m_logo" aktyw="false" id="Huize Moerenburg 1697" www=
  <modules name="m_copyright" aktyw="true" id="Bolpanorama" www="http:
  <modules name="m_social" aktyw="true" />
  <modules name="m_vrmenu" aktyw="true" />
  <modules name="m_stickers" aktyw="false" groups="" />
  <modules name="m_infobox" aktyw="false" />
  <modules name="m_keepview" aktyw="false" />
  <modules name="m_arrowmode" aktyw="false" />
  <modules name="m_radarmode" aktyw="true" />
</global_modules>
```

Don't change Tourdata.xml (visitors can change/editing sticker module)

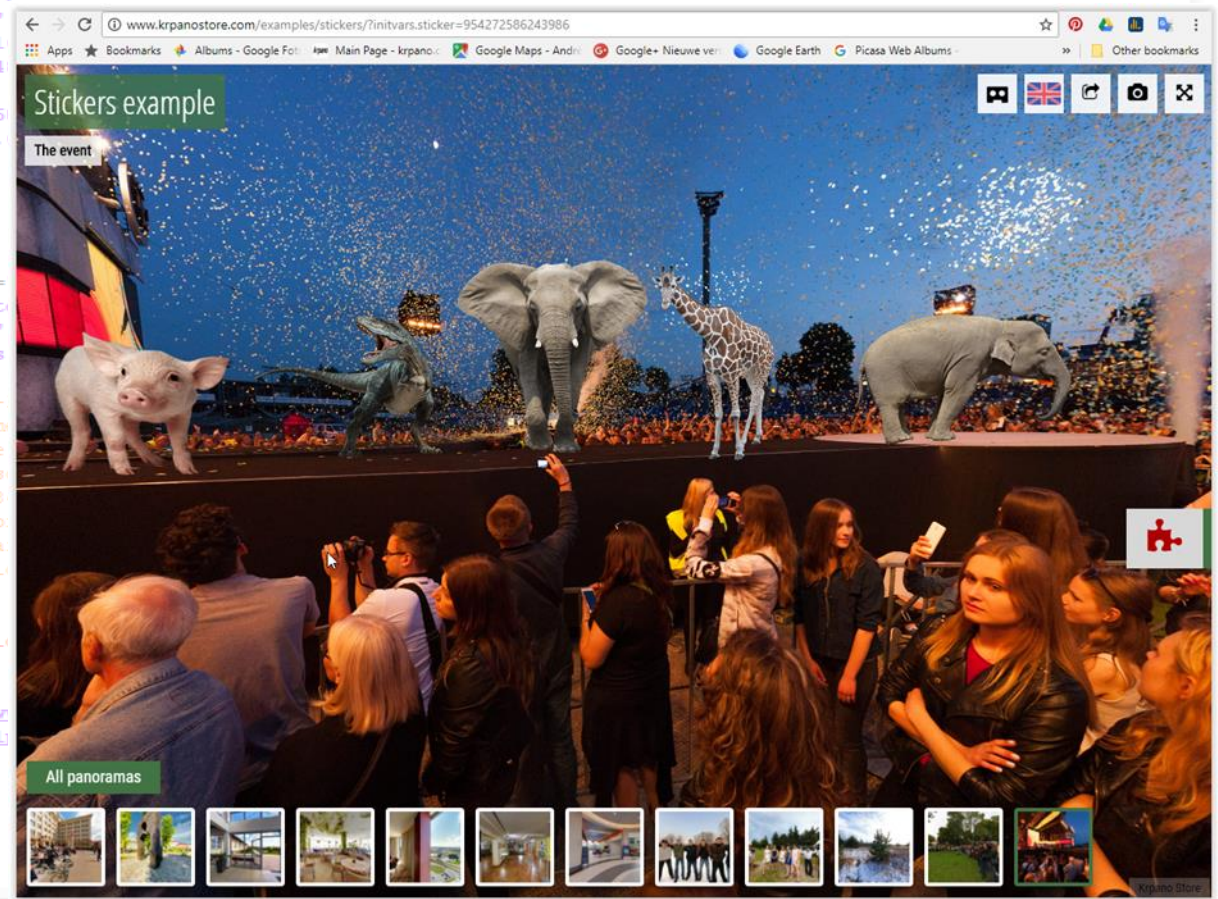

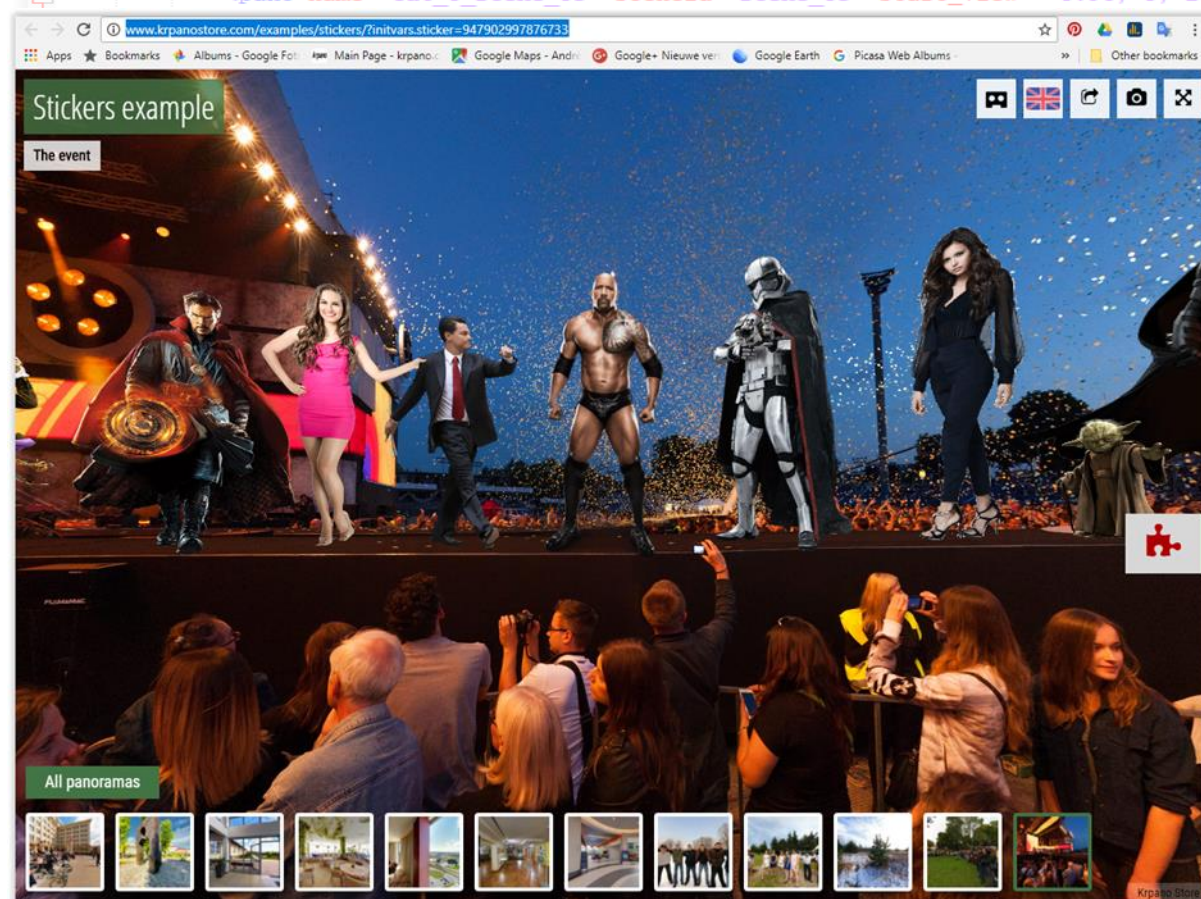

- When we let the visitors of the virtual tour not only look but also can make changes and generate specific link.
- Do not change tourdata.xml and visitor can 2 sticker groups editing.
- `<modules name="m_stickers" aktyw="true" groups="moerenburg|eeuw" />`

```
<global_modules>
  <modules name="m_map" aktyw="true" maptype="satelite" distance="kilo>
  <modules name="m_facebook" aktyw="false" id="facebook ID" />
  <modules name="m_analytics" aktyw="true" />
  <modules name="m_logo" aktyw="false" id="Huize Moerenburg 1697" www=
  <modules name="m_copyright" aktyw="true" id="Bolpanorama" www="http:
  <modules name="m_social" aktyw="true" />
  <modules name="m_vrmenu" aktyw="true" />
  <modules name="m_stickers" aktyw="true" groups="moerenburg|eeuw" />
  <modules name="m_infobox" aktyw="false" />
  <modules name="m_keepview" aktyw="false" />
  <modules name="m_arrowmode" aktyw="false" />
  <modules name="m_radarmode" aktyw="true" />
</global_modules>
```

Example from www.krpanostore.com

- Visitors can editing/change the sticker module and generate specific link.
- Left link: <http://www.krpanostore.com/examples/stickers/?initvars.sticker=947902997876733>
- Right link: <http://www.krpanostore.com/examples/stickers/?initvars.sticker=954272586243986>

VTB - STICKERS MODULE

The End

Virtual Tour Builder: by Spacery Wirtualne - info@spacerywirtualne.pl

- Created by André Wils

De stickers module is gebaseerd op specifieke verbindingen die worden gegenereerd door PHP.

Hierdoor is de privacy verzekerd dat alleen de mensen die deze link hebben de stickers zien en mogelijk ook kunnen veranderen.
